Surgery and Laparoscopy Torso

This trainer is aimed at all levels of surgeons in training whose surgical skills require extra practice. Once set up, the torso can be used to self educate using his / her preferred surgical laparoscopic instrumentation for a variety of techniques. The Torso has the following features:

- Can insufflate and maintain air tight pressure
- Supports usage of wet tissue or prepared artificial materials
- Can be used for surgical diathermy. There is a fixed metal plate in the base of the unit with a connection on the outside to enable earthing
- Can be easily cleaned by flushing out through a large airtight drain plug
- Is light weight and has a carrying handle

75x55x22.5 cm

Skin Suture Trainer

A great low cost way to practice surgical opening and closing techniques.

Features:

- Economical reversible pad
- The material has been designed to make complex incisions such as “flap and dog turn” suturing more realistic
- A sub-dermal layer is present so that it is possible to make secure intra-dermal sutures
- Base has suction feet to enable slip free use

11x14 cm

Options and Replacements for 9985-1005135

Organ Board

The Organ Board allows trainers to prepare specimens in advance for use in the Surgery and Laparoscopy Torso. The board has a simple interchangeable push-peg and hoop-tie system for securing specimens. A diathermy plate is mounted on the board. Furthermore, suction feet provide a firm fixing for the board within the torso.
