

VWR® SuperClear™ Ultra-High Performance Centrifuge Tubes with Flat or Plug Caps, Polypropylene

- Thick-Wall Construction for High-Speed Operation
- Leakproof
- Available in Earth Friendly® Recyclable Racks
- RNase-, DNase-, and Endotoxin-Free
- Validated ISO 11137 Sterile Process

These popular conical-bottom centrifuge tubes are made of ultra-clear polypropylene copolymer. They feature printed graduations and smooth inner walls for easy filling and sample preparation. Printed writing area on side allows for permanent coding. Autoclavable at 122°C (251.6°F). Freezable to -90°C (-130°F).

Caps are available in two styles: flat, with a smooth surface for additional labeling options and plug style for a secure seal when using shakers and horizontal incubators. All caps are made of high density polyethylene and are autoclavable. Caps must be loosely attached to tubes when autoclaving.
