Canine Ventilation/Anesthesia Masks

These masks provide a convenient way of providing artificial ventilation or administration of anesthetic gases to dogs. They are constructed of rugged transparent polycarbonate. One end has a standard 15 mm (3/5 in) taper for connection to anesthesia tubing, while the other end has a soft flexible rubber diaphragm that molds itself to the contours of a dog's snout.

Two sizes are available. The small mask has an unstretched diaphragm opening of 2.5 cm (1 in), while the large mask has an unstretched opening of 4.4 cm (1-3/4 in).

- For rats, guinea pigs, birds, and mice
- Simple, yet effective design

Small Animal Anesthesia Masks

These Anesthesia Masks were designed with smaller animals in mind. They have a simple cylindrical shape with a rubber diaphragm. A small slit is cut in the diaphragm to accommodate the animal's snout or beak. The opposite end tapers down to a standard press fitting port measuring 15.3 mm OD x 11.9 mm ID. These Masks can be used with Bain circuits, non-rebreathing systems, or 'Y' pieces. Includes 1 diaphragm.
