

0,1 - 20 µl

Pipette Tips, 0,1 - 20 µl

Bulk/racked, standard/ULR, sterile/non-sterile

Pipette tips, bulk, 0,1- 20µl, non-sterile, PP, IVD, colorless

Minimum order quantity / quantity interval: 2000 pieces (2 bags with 1000 pcs.)

Cat. No.: 732002

30,65 EUR

Recommended sales price without VAT (PL 2015)
per 1000 on orders of 2000.

Product description

The nano-cap™ tip was **especially developed for the nanoliter range** and hence is ideal for molecular biological applications such as PCR. It is 37 mm long, and features a capillary rise that is even visible to the naked eye at 0.1 µl.

- The capillary part of the tip conveniently fills gel wells for gel electrophoresis systems from most manufacturers.
- Suitable for pipettes up to 20 µl.
- The racked tips are colorless and placed into a grey-colored tip tray.

The surfaces of the **Ultra Low Retention tips (ULR)** are produced through a special physicochemical process. The homogeneous, defect-free surface thus produced has extremely low surface tension – over 50% less than PTFE. This significantly reduces sample loss and provides substantially higher reproducibility when working with critical media.

- Ideal for biological samples that contain detergents such as TRITON™ X-100, SDS, Tween etc.
- No additives that can be leached out! No siliconization of the surface!
- High chemical resistance. Ideal for working with solvents.
- The tips can be autoclaved at 121 °C (2 bar) without damaging the material properties.

Specification

description		bulk, in bags
Type		standard
description		non-sterile
number of tips		2000
