

0,1 - 20 µl

**Pipette Tips, 0,1 - 20 µl**

Bulk/racked, standard/ULR, sterile/non-sterile

**Pipette tips, racked, TipRack, 0,1-20µl, non-sterile, PP, IVD**

Minimum order quantity / quantity interval: VE = 960 pieces (10 racks à 96 pieces)

**Cat. No.: 732102**

**42,20 EUR**

Recommended sales price without VAT (PL 2015)  
per 1 on orders of 1.

**Product description**

The nano-cap™ tip was **especially developed for the nanoliter range** and hence is ideal for molecular biological applications such as PCR. It is 37 mm long, and features a capillary rise that is even visible to the naked eye at 0.1 µl.

- The capillary part of the tip conveniently fills gel wells for gel electrophoresis systems from most manufacturers.
- Suitable for pipettes up to 20 µl.
- The racked tips are colorless and placed into a grey-colored tip tray.

The surfaces of the **Ultra Low Retention tips (ULR)** are produced through a special physicochemical process. The homogeneous, defect-free surface thus produced has extremely low surface tension – over 50% less than PTFE. This significantly reduces sample loss and provides substantially higher reproducibility when working with critical media.

- Ideal for biological samples that contain detergents such as TRITON™ X-100, SDS, Tween etc.
- No additives that can be leached out! No siliconization of the surface!
- High chemical resistance. Ideal for working with solvents.
- The tips can be autoclaved at 121 °C (2 bar) without damaging the material properties.

**Specification**

description		TipRack
Type		standard
description		non-sterile
number of tips		960
