CRYOTUBE COOLER -20C PC CSI

Designed specifically to protect enzymes, reagents, cells, and solutions by maintaining temperatures between -20°C and -15°C for up to four hours. Break-resistant polycarbonate cooler holds twenty 1.5–2.0mL microcentrifuge tubes or NUNC® CryoTube® vials. Included inserts hold 0.2–0.5mL microcentrifuge tubes. Printed grid helps to inventory tubes while the keyed lid maintains proper orientation. Locking handle for safe and easy transport. Nonskid feet on bottom prevent cooler from sliding on the benchtop.
