

HCS-200-RT type electronic scale whether our company develop produce pay direct current dual- purpose electronic weighing apparatus of special type, this product has adopted eight one-chip computers of high performance and high-accuracy sensor technology, because eight one-chip computer operate procedure have zero autotracking , automatic standard , anti-interference and vibration person who discern procedure software, so, the HCS-200-RT type electronic scale has precision high, the digital display is steady, measure speed soon , use outstanding advantage such as being easy to operate; And is furnished with the height measurer. This extensive suitable enterprise of product , degree , hospital , health station and sports activity department measure the using of weight , height. It is the family health care, first-selected ideal of weight-reducing that measure tools too.

The top is weighed greatly : 200Kg

Minimum graduation value: 100g

Precision: Accord with the balance standard of OIML grade

The height measurer measures the range 70×190cm

Value of minimum graduation of the height measurer 0.5cm

Display mode LCD or LED (can be chosen according to the needs of user)

Operate the key of the keyboard: Adopting the flat touching type, have waterproof functions, totally three function keys

The voltage of the power : It is dual-purpose to adopt and hand in directly , exchange 220V +10 /15% direct current 6V , 5Ah are non-maintaining, but rechargeable battery

Working environment : 0 40 90-RH Reveal wirelessly

Size of the packaging 23.5 x 37 x 99 cm

Gross weight: 15.5 kg Net weight: 13 kg
