

HI 8010 and HI 8014 are rugged, hand-held pH meters specifically designed with ease of use in mind. These affordable meters are ideal for education and field applications.

HI 8010 and HI 8014 perform pH measurements with manual temperature compensation. HI 8014 also performs ORP measurements.

Users can easily select between the different measurement modes: pH, ORP or temperature compensation, depending on the model.

2-point calibration can be performed with trimmers on the front panel. The set values are stored even when the meter is shut off.
