

IMS Dosing Cannulae and Disposable Animal Feeding Needles

IMS Dosing Cannulae

Suitable for small animals, reptiles and birds, these cannulae are made of stainless steel with a Luer fitting and a bulbous tip. They can be sterilized and re-used.

Order #	Product
PY2 34-0326	Dosing Cannula, 200 mm x 12 ga, Lawton curved, pkg. of 2
PY2 34-0327	Dosing Cannula, 125 mm x 14 ga, Lawton curved, pkg. of 2
PY2 34-0316	Dosing Cannula, 75 mm x 16 ga, Curved, pkg. of 3
PY2 34-0317	Dosing Cannula, 75 mm x 16 ga, Straight, pkg. of 3
PY2 34-0318	Dosing Cannula, 50 mm x 18 ga, Curved, pkg. of 3
PY2 34-0319	Dosing Cannula, 50 mm x 18 ga, Straight, pkg. of 3
PY2 34-0320	Dosing Cannula, 25 mm x 20 ga, Curved, pkg. of 3
PY2 34-0321	Dosing Cannula, 25 mm x 20 ga, Straight, pkg. of 3
PY2 34-0322	Dosing Cannula, 38 mm x 20 ga, Curved, pkg. of 3
PY2 34-0323	Dosing Cannula, 38 mm x 20 ga, Straight, pkg. of 3
PY2 34-0324	Dosing Cannula, 38 mm x 22 ga, Curved, pkg. of 3
PY2 34-0325	Dosing Cannula, 38 mm x 22 ga, Straight, pkg. of 3
PY2 34-1400	Dosing Cannula, 1 of each size, pkg. of 12

Disposable Animal Feeding Needles

- Sterile, non-toxic, non-pyrogeni

These feeding needles feature plastic luer hubs and silicone tips. Supplied straight, but can be bent to desired shape. Available in three sizes. They are supplied in sterile, Tyvek® peel pouches containing five needles each.

Order #	Gauge	Length
PY2 59-8635	20	38.1 mm (1-1/2 in)
PY2 59-8636	18	50.8 mm (2 in)
PY2 59-8637	15	76.2 mm (3 in)

feeding needles

Harvard/Instech Solomon Plastic Feeding Tubes

- Flexibility reduces risk of perforation
- Soft rubber tip minimizes trauma
- No labor-intensive cleaning/sterilizing
- Reduced risk of residual compound
- Reduced risk of cross-contamination

Many researchers have converted to the plastic feeding tube for the increased tubing flexibility which reduces trauma and perforation and for the simplicity of a low cost, disposable device. These tubes feature medical grade materials designed to minimize the risk of interactions with test compounds. The tube is constructed of polypropylene which is the same material used in plastic syringes. The soft, bulb-shaped tip is fabricated from elastomer (though virtually none of the tip is in the fluid path). The soft, bulb-shaped tip is designed to obviate inadvertent tube placement in the trachea and to reduce the risk of trauma and perforation.

Instead of using the solvents and glues used by other plastic feeding tubes, the manufacturing process insert molds the luer and the rubber tip directly to the tube. This method, though more costly, improves the bond strength of these connections and assures more consistent quality.

These feeding tubes are available in a variety of diameters and lengths to allow for use in most small laboratory animals. They are supplied in sterile pouches of 5 tubes. 50 pouches are supplied for a total of 250 tubes.

Specifications*

Material	Medical-grade polypropylene (Luer and tube), elastomer (tip)
Tube Sizes	22, 20, 18, 15 and 13 gauge
Tube OD x ID & color:	
22 ga	0.71 mm x 0.035 mm, black
20 ga	0.9 mm x 0.5 mm, yellow
18 ga	1.2 mm x 0.7 mm, pink
15 ga	1.8 mm x 1.2 mm, blue
13 ga	2.4 mm x 1.6 mm, purple

*Note: All sizes provided sterile in pouches of 5 ea, 50 pouches per box.

feeding needles

Stainless Steel Feeding Needles

Stainless Steel Feeding Needles

- For intubation of mice, rats, guinea pigs, rabbits and other small laboratory animals
- Sterile
- Autoclavable

These precision-crafted stainless steel balls and tubing will not injure sensitive tissues. They are the ideal choice when a single use disposable feeding needle is not required. They are supplied in a package of 12.

To prevent cross infections and to maximize convenience, keep a supply of needles on hand at least equal to the number of animals under investigation.
