Portable Table Top High Pressure Steam Sterilizer
MODEL: TA-300

FEATURES

Compact and portable high pressure steam sterilizer with large capacity.

Can be operated on any flat stable surface.

With stainless steel dressing case attached.

Designed for sterilization of wrapped or unwrapped instruments, liquids, cotton dressings, bandages or dentistry appliances.

Manufactured from high quality #304 stainless steel, durable design.

The heater unit is made of stainless steel for rapid heating.

An over heat protection switch cuts off heater power automatically when the chamber water level is low.

Two pressure regulators maintain the desired chamber pressure (1kg/cm² - 121°C or 2kg/cm² - 132°C) and discharge the unsaturated steam from the chamber, ensuring sanitary sterilization.

Pressure gauges show accurate temperature of chamber interior.

Lightweight bakelite door handle secure door opening & closing.

Pressure tight silicone gasket is highly heat resistant and durable.

Easy to operate with the set of the timer to start sterilization cycle operation.

Buzzer sounds on the completion of sterilization and cuts off power source automatically.

SAFETY DEVICES

Overheating Protection Switch.

Double Safety Valve.

SPECIFICATIONS

Chamber Size: ø 230 x 390mm

Chamber Capacity: 16 Liters

Overall Dimension: (W)320 x (D)560 x (H)460mm.

Heater Element: 1KW

Sterilizing Temperature & Pressure: 1kg/cm² 121°C or 2kg/cm² 132°C

Timer: 60 minutes

Power Source: AC 110v 60Hz / 220v 50Hz / 380v 50Hz

Portable Table Top Sterilizer
TA-300

STANDARD ACCESSORIES

Shelf: 1pc

Sterilization Box: 1pc

REMARKS

When ordering, please specify sterilizing temperature (121°C or 132°C) and power voltage you require.

Custom design and OEM are welcome and accepted.
