

TROMBOMIXER 307

Ljungberg-kogel AB, SWEDEN.

Trombomixer 307 has 30 bag capacity. Providing a means of keeping platelets in suspension in their bags, the Trombomixer 307 gives smooth and silent running without "hobbling", even if the basket is unevenly loaded.

A friction clutch between the basket and motor allows the agitator to be stopped using a finger-tip. There is no heat transmission between the motor and basket, and good air circulation is allowed around the bags.

TECHNICAL DATA

Voltage	240/220/110V
Power consumption	40W
Capacity	30 bags
Mixing cycle	6 rpm
Dimension	526x300x244 mm
Max height when operating	344 mm
