Adult

### Adult ACLS Manikin with Interactive Arrhythmia Simulator

This full body manikin offers a wide range of ACLS training possibilities including arrhythmia recognition and confirmable defibrillation. The manikin is supplied with a storage case and allows training of the following ACLS procedures:

#### CPR

- Palpable and visual landmarks
- Fully articulated head, neck and jaw
- A printer unit allows CPR evaluation (adult/child mode, confirmation of proper hand placement, shows compression rate and depth plus ventilation duration and volume)

#### Airway Management

- Realistic anatomy of the mouth, tongue, oral pharynx, larynx, epiglottis, vocal cords, trachea and oesophagus
- Cricoid cartilage allows for practice of Sellick manoeuvre
- Separate left and right lungs for auscultation
- Suctioning capabilities
- Oral, nasal and digital intubation capabilities

#### I.v. and I.m. Injection (arm)

- Articulated at the biceps for antecubital and dorsal access
- Bony landmark at shoulder to identify muscle tissue for i.m. injections
- Realistic flashback from a pressurized system

#### Blood Pressure Measurement

- Instructor determines systolic and diastolic levels, heart rate and sound volume
- Speaker in arm reproduces real blood pressure sounds
- 5 Korotkoff phases can be turned on and off
- Auscultatory gap can be turned on and off

#### Defibrillation Chest

- Internal load box absorbs full strength of every shock
- Manual, semi-automatic, automatic defibrillation
- Monitor manikin like a real patient at 4 ECG sites and 2 defibrillation sites
- Compatible with all standard brands and types of defibrillators and ECG-monitors

### Adult ACLS Torso with Interactive Arrhythmia Simulator

This easy to transport torso allows training for the same procedures as W44134, but without blood pressure measurement, i.v. and i.m. injection (at arm), storage case and without printer unit. Ventilation bag, laryngoscope, tube and electrodes are not included in scope of delivery.
