

Operating Table and Thoracic Positioners

operating tables

Large Animal Operating Table

The Harvard Apparatus large animal operating tables can lift a weight of up to 150 kg (330 lbs) from 490 mm (19.3 in), up to a height of 970 mm (38.2 in). This minimizes operator lifting injuries within a veterinary or pre-clinical operating theatre environment. These tables are available in heated and non heated options. All Tables measure 1,200 x 600 mm (47.2 x 23.6 in) . All table surfaces are made from the finest quality AISI-316 stainless steel. Other table surfaces are available, including rubber and laminate. Each table comes with locking castors and remote handheld operating device.

All heated tables come with power sockets to provide a power source for other equipment, and a digital heater controller to control the table surface temperature.

Plastic Thoracic Positioners

- Durable, lightweight plastic
- Transparent to light and x-rays
- Easy-to-clean
- Low heat loss

These Thoracic Positioners are designed to hold the animal in the desired operating position and are available in three sizes.

Since these positioners are constructed of plastic instead of stainless steel, the animal will lose less body heat during surgery.

Plastic Thoracic Positioners

Order #	For use with	Animal Weight	Dimensions, H x W x D
PY2 59-6435	Cats and Small Dogs	Up to 9 kg (20 lb)	5.7 x 20.3 x 17.8 cm (2-1/4 x 8 x 7 in)
PY2 59-6436	Medium Dogs	9 to 18 kg (20 to 40 lb)	7 x 25.4 x 20.5 cm (2-3/4 x 10 x 8 in)
