9985-1000251

Functional Ear Model

This model shows how the tympanic membrane, ossicles, the complex internal ear with the cochlea and the oscillations of the basilar hearing membrane operate /interact. The enclosed mirror enables operation of the model for the studying of various ear functions from different angles at the same time. One single model may be studied by several students simultaneously in an action oriented learning situation. Includes a four colour explanatory chart.
30x20x15 cm; 1.0 kg
