Casualty Simulation Kit IV

This complex EMT (Emergency Medical Training) kit uses components applied to human and manikin patients to get the widest variety of training situations possible. Wounds strapped on, stuck on, created from wax and made to bleed challenge both the volunteer and the professional in areas of burns, lacerations, fractures of arms and legs and amputations; a good kit to simulate community disasters like bus accidents, or building explosions. The kit is supplied in a storage case and includes:

Bleeding wounds (complete with reservoir bags with pump assembly):

- 1 jaw wound
- 1 abdominal wound with protruding intestines
- 1 sucking wound of chest
- 2 compound fractures of humerus
- 2 compound fractures of femur
- 2 compound fractures of tibia
- 1 laceration of the forehead
- 1 open amputation
- 2 gunshot wound of palm

Non-bleeding wounds:

- 36 assorted stick-on lacerations and open fracture wounds
- 1 phosphorous burn of the hand
- 1 face in shock
- 2nd & 3rd degree burn of the face
- 2nd & 3rd degree burn of the chest
- 2nd & 3rd degree burn of the back
- 2nd & 3rd degree burn of the hand
- 2nd & 3rd degree burn of the forearm

Make-up Accessories:

1 mirror; 1 body adhesive for stick-on wounds; 2 casualty simulation wax; 3 bottles coagulant make-up blood; 5 pkg. blood powder, each for 4.5 litre simulated blood; 1 pkg. methyl cellulose for blood thickening; 4 grease paint colours: white, blue, brown and red; 2 pkg. broken Plexiglas® for simulating glass imbedded wound; 1 cold cream; 2 atomizer mist sprayer; 2 plasticine modelling paste: white and dark; 6 tongue depressors; 1 pkg. of tissues; 2 fake dirt; 1 charcoal; 1 petroleum jelly; 2 spatulas 61x23x46 cm; 14.6 kg

Forensic Science Wound Package

These wounds are the special stick-on wounds found in the Forensic Science Wound Simulation Kit. You receive the 18 wounds developed for forensic science. Use these to augment your existing casualty simulation kit.

Wounds Included:

Petechiae; ecchymosis; pattern ligature; slash; shotgun close range; shotgun; intermediate range; intermediate range round; intermediate range flake; exit gunshot; contact gunshot contact handgun; contact wound; screwdriver; bite partial; bite complete; hesitation; single-edge knife; double-edge knife; blunt bat; bunny ears exit wound; exit wound ice pick.

36x25x15 cm; 5 kg

Forensic Science Wound Simulation Kit

This basic wound identification set was developed with the help of forensic experts and contains a number of injuries developed specifically for students to acquire proficiency in crime scene analysis and crime scene reconstruction. The details in the wounds are designed to determine type of weapon, direction of force, and other related details that only come with realistic trauma reproduction. This innovative kit contains carefully sculpted models of injuries taken from actual victim's wounds and reviewed by forensic education professionals ensuring real scene representations of trauma commonly found on violent crime victims.

This kit is a must for any applied program of wound study. Materials in this kit will provide first time exposure for the novice as well as continued training for the professional already in the field. From simple puncture wounds associated with sharp instrument trauma to firearms entry and exit wounds, this kit is critical in studying the methodology of crime scene reconstruction based on wound demographics. Can you recognize pattern ligature in strangulation? What was the murder weapon? What does a single bladed knife stab wound look like compared to a double edge wound? What are the difference between the wound of mechanism for suicide and hesitation marks? Each of these questions and more are addressed with a kit that also includes moulage wax, coagulant blood, and a selection of make-up for bruising, blanching and lividity. The entire case is packed in a sturdy carrying case for protection and ease of transportation to the training site. 24 different wounds in the kit; 72 pieces in all.

Wounds Included:

Petechiae; ecchymosis; pattern ligature; slash; shotgun close range; shotgun; intermediate range; intermediate range round; intermediate range flake; exit gunshot; contact gunshot contact handgun; contact wound; screwdriver; bite partial; bite complete; hesitation; single edge knife; double-edge knife; blunt bat; bunny ears exit wound; exit wound ice pick; compound fracture humerus; foreign body protrusion; large laceration; medium laceration large compound fracture; 2nd degree burn.

53x33x38 cm; 6 kg
