Episiotomy Suturing Simulator, Set of 3

This simulator provides a realistic way for students to learn surgical techniques without the constraint of time and concern for safety, which are factors with a live patient. In addition to being portable, the lifelike texture allows the learner to develop a “feel” for instrument handling, tension on suture and the advantages of one method of tying knots over another. The set includes midline, left mediolateral and right mediolateral episiotomies and is supplied in a storage case.

Needle holder, suture material and tweezers are not included in scope of delivery.

20x15x7 cm; 1.5 kg
