

BL-UP2 Basic Langendorff System Isolated Rat Heart\UP-100 base

Item No : 73-3725

Basic, turnkey systems for the perfusion of isolated rat heart according to Langendorff, our Basic Langendorff systems are simple to use, compact and complete. Measurement of perfusion pressure, perfusion flow and LVP are provided under either constant pressure or constant flow conditions. Acquisition and advanced online analysis of physiological data are simplified and straightforward using the included HSE ISOHEART software.

Full Description

- Basic, turnkey systems for Langendorff perfusion of isolated rat heart
- Constant flow or constant pressure perfusion using the same equipment
- Easy to use and very compact
- Flexible perfusion system based on our UP-100 for students
- Langendorff perfusion only for hearts
- Easily adapted to perfuse other organs like liver or kidney
- Advanced, yet simple to use data acquisition and analysis

Basic, turnkey systems for the perfusion of isolated rat heart according to Langendorff, our Basic Langendorff systems are simple to use, compact and complete. Measurement of perfusion pressure, perfusion flow and LVP are provided under either constant pressure or constant flow conditions. Acquisition and advanced online analysis of physiological data are simplified and straightforward using the included HSE ISOHEART software.
