BS4 61-0183
Hot Bead Sterilizer,
Surgical
Instruments
Sold Separately

- Fast and easy to use
- Ideal for decontaminating microsurgical instruments used in small animal surgery
- No messy chemicals or need for open flame in laboratory

Hot Bead Dry Sterilizer

This compact unit provides a quick and easy way to sterilize surgical instruments. The stainless steel, central well is filled with dry glass beads that are heated to 500°F. Simply insert an instrument into the beads and, within 15 seconds, the submerged portion of the instrument is sterilized. It's that easy! This unit is supplied ready to use. Replacement glass beads are available separately. This product is a must for any laboratory doing small animal surgery.
