

VWR® Disposable Transfer Pipets, Graduated

VWR® Disposable Transfer Pipets are ideal for quick and safe fluid transfer. Manufactured from LDPE, they can be sealed, refrigerated, and gas sterilized.

- Will not shatter or break
- Can be used in liquid nitrogen
- Nontoxic and inert
- No bulb to insert or remove
- Uniform drop size

These unbreakable all-in-one graduated transfer pipets eliminate the hazard of broken glass and exposure to infectious materials. Molded from see-through low density polyethylene, pipets are inert to biological fluids and most acids, and can be sealed and refrigerated. The low-affinity surface reduces the loss of cells and valuable proteins due to binding. Ideal for quick, safe transfer of fluids. Transfer pipets can be gas sterilized.
