SPERIAN Tuff-Knit KV™ Cut-Resistant Kevlar® Gloves

The reliable cut and slash protection of Kevlar

Gloves knitted with 100% Kevlar fiber provide excellent protection from cuts, slashes, and abrasion. Kevlar withstands temperatures up to 900°F (480°C) without breaking down. Seamless knit construction eliminates uncomfortable seams that can rub or chafe. Easily laundered with minimized shrinkage.

SPERIAN Tuff-Coat™ Nitrile-Coated Kevlar® Gloves

Cut resistance of Kevlar with the added grip of nitrile

These Tuff-Coat gloves are constructed of a seamless Kevlar shell dipped in nitrile. The green nitrile coating on the palm and fingertips provides an excellent wet or dry grip, and adds a level of abrasion resistance to the cut resistant Kevlar without sacrificing dexterity or flexibility. Nitrile is also resistant to solvents and other chemicals. The backs are open to provide ventilation.

Catalog number	Size	Price per pair	
		1 pr	12 pr
CV-86411-06	Small	\$8.75	\$7.88
CV-86411-07	Medium	8.75	7.88

Ansell Vantage® Cut-Resistant Gloves

Maximum safety without sacrificing dexterity, durability, or comfort

Ansell's Vantage series integrates Kevlar® fiber plated with a polyester/cotton blend to provide increased cut protection without the added bulk. Due to an exclusive blend of fibers and a unique manufacturing process, Vantage gloves are lightweight and comfortable, increasing employee compliance and reducing potential for injury. They are ideal for work environments where sharp tools and materials are handled. Available as a standard weight or heavyweight loop-in terry. Provide ANSI level 4 cut protection.
