

## Induction Chambers

*This cylindrical acrylic chamber is ideal for anesthetizing small animals such as rodents, guinea pigs, and birds. It has two, 1/4 inch barbed hose fittings. One for gas delivery and one for gas scavenging. The gas delivery barb directs the flow of anesthetic gas towards the bottom of the chamber. The chamber has a routed top that ensures a perfect fit. There are no corners so cleaning is easy. Includes 10 ft. of 0.25" ID tubing.*

Clear acrylic for easy animal observation

- Two sizes
- Ideal for small animals
- Stainless steel false bottom
