

## Life/form® CPARLENE® Manikins

**Life/form®**  
"Saving Lives Worldwide"

Printout Shown  
on Page 173

### Electronic Monitoring with CPARLENE®

Electronic monitoring allows trainees to critique their performance at a glance. All electronic monitoring units are housed outside the CPARLENE® manikin, connected by a quick-release interface jack similar to a telephone extension. Portable electronics allow monitors, not students, to be moved from manikin to manikin. Helps reduce cross-contamination. All units are powered by "C" or "D" batteries, and change from adult to child readings with the flip of a switch. All electronic CPARLENE® models come complete with a washable jogging suit, child springs, and a carry case with wheels.

LF03711U

- Disposable tracheal airway and lower airway with lung bag eliminate time-consuming disinfection procedures
- Each face mask is designed with a one-way, disposable, non-rebreathing valve
- Individual student face masks provide maximum protection against cross contamination

- Jaw thrust feature
- May be reused after proper disinfection
- Requires no cleaning!
- 5 sanitary face masks
- 10 disposable airways
- 10 disposable tracheal airways

### Full Manikin with Memory and Printer\*

These manikins provide maximum student/instructor feedback in four practice modes: compression rate, compression depth, ventilation duration, and ventilation volume. Red light indicates improper hand placement. The performance of each skill is displayed separately while averages are stored in the memory. With the flip of a switch, memory unit evaluates performance based on child or adult CPR standards. The manikin with both memory and printer will print out test strips that plot and tabulate test performance skills indicating average rate, depth, placement and compressions, and average duration and volume of ventilations in either adult or child mode. Jaw thrust feature. Power saver feature automatically turns unit off, but retains previous data. Low battery indicator. Three-year warranty. Sh. wt. 66 lbs. (29.94 kg).

### Torso With Light Controller\*

This CPARLENE® Torso comes with a three-color Light Controller Box that indicates acceptable ventilation volume, compression depth, and improper hand placement. With the flip of a switch on the light box and the change of compression springs, child CPR can be practiced. Jaw thrust feature. The torso is clothed in a washable, short sleeve athletic jacket and includes supplies and a soft carry case with wheels. Three-year warranty. Sh. wt. 39 lbs. (17.69 kg).
