

Littmann Classic II

Littmann Classic II S.E. Stethoscope for a quality scope with high acoustic sensitivity. The two-sided chestpiece features a traditional bell function on one side and a tunable diaphragm on the other. The tunable diaphragm allows you to easily switch between low- and high-frequency sounds without turning the chest piece over. This stethoscope was designed for general practitioners, medical students, and nurses to use in physical assessments and diagnoses.

Single-lumen tubing is available in a variety of popular colors. Your comfort is assured with an angled, anatomically correct headset and patented 3M Snap Tight Soft-Sealing eartips that also create a superb acoustic seal. Your patients will appreciate the non-chill rim and diaphragm.

Three year manufacturer's warranty.

28 inch (71cm).
