

Interactive Birthing Simulator with Laptop Computer

This simulator of a full size articulating female is designed to provide a complete training of prenatal, intra partum, and postpartum skills as well as emergency care for the mother and the neonate after birth.

Interactive Mother Features:

- Intubatable airway (visible chest rise)
- I.v. injection arm
- Inflatable stomach cover to practice Leopold's manoeuvre
- Sensors for connection with computer interactive system: Virtual instruments used to monitor and treat the mother include heart rate, blood pressure, pulse oxygenation, and ECG

Interactive Resuscitation Neonate Features:

- Site specific heart and lung sounds which can be heard through a stethoscope
- Exhibits skin colour change with oxygen deficit
- Intubatable airway
- Umbilical catheter site
- Sensors for connection with computer interactive system: Virtual instruments used to monitor and treat the foetus include heart rate, virtual ultrasound and foetal monitor

CodeMaker:

- Permits instructor to define thousands of test scenarios from point and click menus, tests may be stored, resumed or printed
 - Programmable automatic birthing system with articulating foetus and placenta
 - Frees the instructor from "birthing duties" as the foetus descends and rotates automatically through the birth canal and dilates the cervix 2-10 cm as labour progresses
 - Demonstration of placenta previa
- Supplied with 4 umbilical cords, 4 dilating cervixes, 2 umbilical clamps, talcum powder, lubricant, Multimedia laptop computer, carrying cases.

Episiotomy Suturing Simulator, Set of 3

This simulator provides a realistic way for students to learn surgical techniques without the constraint of time and concern for safety, which are factors with a live patient. In addition to being portable, the lifelike texture allows the learner to develop a "feel" for instrument handling, tension on suture and the advantages of one method of tying knots over another. The set includes midline, left mediolateral and right mediolateral episiotomies and is supplied in a storage case.

Needle holder, suture material and tweezers are not included in scope of delivery.

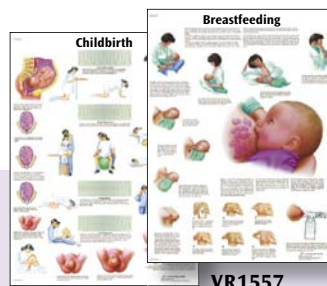

20x15x7 cm; 1.5 kg
